Subject: Touch base on RTI effort before call
Start Date/Time: Tue 7/11/2017 3:30:00 PM
End Date/Time: Tue 7/11/2017 4:00:00 PM

ALSO- a quick overview on the WaterGen project.

MI agar and Black mold... RTI will only do one Case Study.

Here are some of the questions they asked to have answered.

- Do they know which of the companies listed in the licensing data, if any, have put this technology to use as a product? If they have not used the technology in a product, have they used it in a process, service, etc.?
- What method of testing does it replace? Will we be able to quantify the differences?
- Will we be able to contact the inventors, the people involved at the companies, people involved from EPA?
- Do you have any other background materials we could review in advance of our call on July 11th?
